

## Book Cover with Elastic Spine

### ABSTRACT

5 A book cover has a front plate having a hinge at one edge  
and a pocket for receiving a front page of a book or  
front sheet of a multi-page insert. The cover also  
includes a back plate having a hinge at one edge and a  
pocket for receiving a back page of a book or back sheet  
10 of a multi-page insert. A laced spine interconnects the  
hinges to enable expansion and contraction as desired to  
accommodate the overall thickness of a book's pages and  
any cuttings or inserts that might later be attached to  
the pages.
